Schedule of work for the development of management procedures for key species in the IOTC

(Ashley J Williams¹, James Larcombe¹ and Heather M Patterson¹)

AUSTRALIA

Resolution 15/10 notes that the objectives of the Commission are 'to maintain stocks in perpetuity and with high probability, at levels not less than those capable of producing their maximum sustainable yield'. To that end, interim and alternate interim limit and target reference points have been adopted by the Commission, and the Scientific Committee has been instructed to 'develop and assess, through the management strategy evaluation process, the performance of harvest control rules to achieve target reference points on average and avoid limit reference points with a high probability'.

The development of management procedures for key IOTC species is underway. The development and review of management procedures through the IOTC committees and sub-committees, and the adoption of management procedures by the Commission, is a complex and iterative process that will likely require several rounds of advice, consideration and review.

The 20th Session of the IOTC Commission noted the substantial work underway in developing management procedures for IOTC stocks and requested 'the SC to develop a work plan reflecting key elements to be agreed and developed, including roles and responsibilities of each of the Commission, Scientific Committee, Compliance Committee and other subsidiary bodies, and also including decision points on these elements for the Commission'. The following draft schedule of work has been developed to address this request from the Commission.

The schedule of work outlines the process that will need to be followed and the decisions that need to be made to give effect to management procedures for target species in the IOTC area of competence. The timeframes presented are indicative only, and may be subject to change. However, the schedule provides a guide for the IOTC committees and sub-committees, and the Commission, to understand their roles and responsibilities in the process of developing and adopting management procedures in the IOTC.

This schedule of work was presented to the 7th Session of the Working Party on Methods (WPM). Positive feedback from the WPM resulted in minor adjustments to the schedule of work to ensure that it aligns with the WPM program of work. This revised paper is intended for consideration by the Scientific Committee and will be presented, with any necessary revisions, to the Technical Committee on Management Procedures and the Commission in 2017.
