Fisheries management

IOTC ROS SFO TR1

This module aims to provide Observers with the required knowledge on the:

- ✓ basic concepts of fisheries management,
- ✓ the usage of observer programs in fisheries management, and
- ✓ IOTC fisheries concepts relevant to scientific observer work

Candidates performance on this training module will be evaluated based on their understanding of the concept of target species; bycatch species; non-target species, retained catch, discarded catch, overfishing, FAD, associated and free school, improper for human consumption as defined by the IOTC.

FISHERIES LAW

The main objective of fisheries legislation is to provide a legal basis for the management of a fishery

"Fisheries law" comprises of

- legislation
- regulations
- administration
- international agreements

All of which can be shaped by a government into a set of instruments for implementing fisheries policy.

FISHERIES LAW

The placement of observers in terms of national and/or international programs requires a

LEGAL MANDATE

Embodied in the *Fisheries Law*

The mandate provides the legal obligation for the observer and outlines the conditions for their deployments.

LEGAL MANDATE FOR OBSERVER DEPLOYMENT

The mandate for observers can be required through a number of organisations involving both national and international fisheries

- National Fisheries in *fisheries legislation and in licence conditions*
- Regional Fisheries Management Organisations (RFMOs) in *Recommendations and Resolutions*
- Fisheries Scientists *seeking specific data*

ANY QUESTIONS?

The screenshot shows a user interface for a Learning Management System (LMS). At the top, there is a navigation bar with the user's name 'T. Athayde | Instructor', a 'Messages' dropdown menu, a 'Help' link, and a search box. Below the navigation bar, the main content area is titled 'Home / Messages'. It features a 'Send message' button and a table with columns for 'From', 'Subject', 'Date', and 'Options'. The table is currently empty.
