# Installing ROS national DB - 1

1. Double-click on the provided installation file:  
**IOTC\_ROS\_tools\_nationalDB\_Setup\_2.1.4\_Win32\_64.exe**
2. A window like **this** will appear

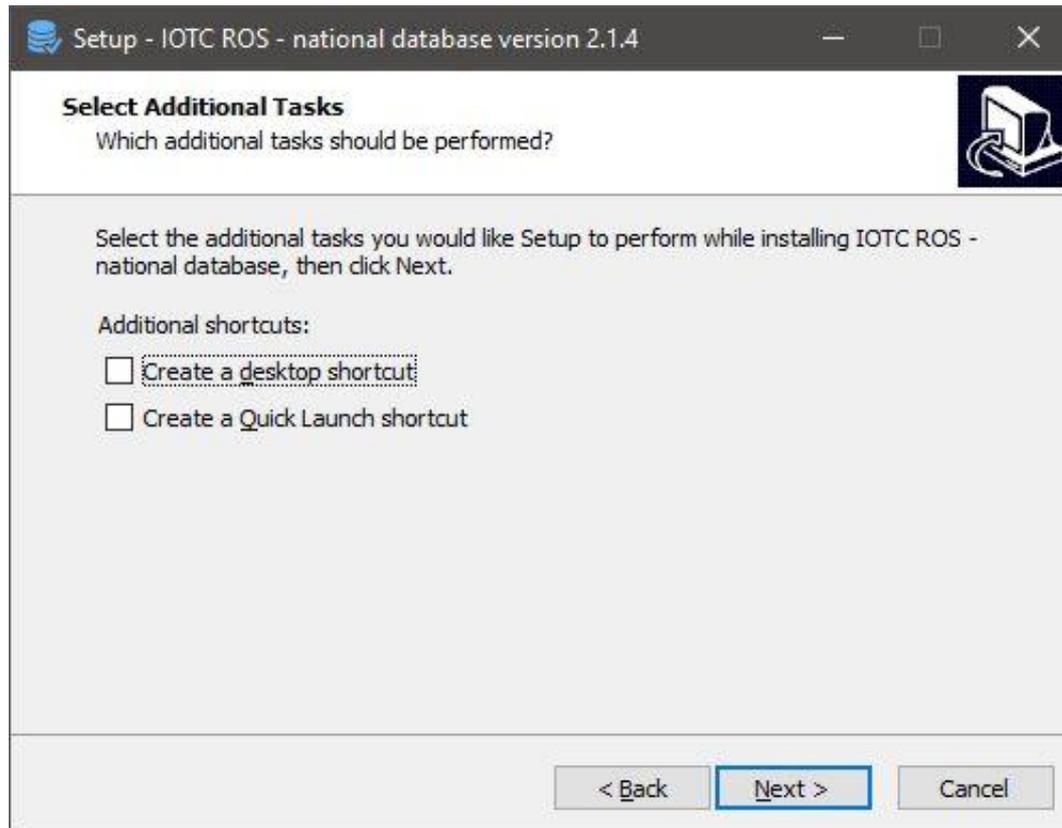

3. Choose your destination folder or leave the default one and click **Next >**

# Installing ROS national DB - 2

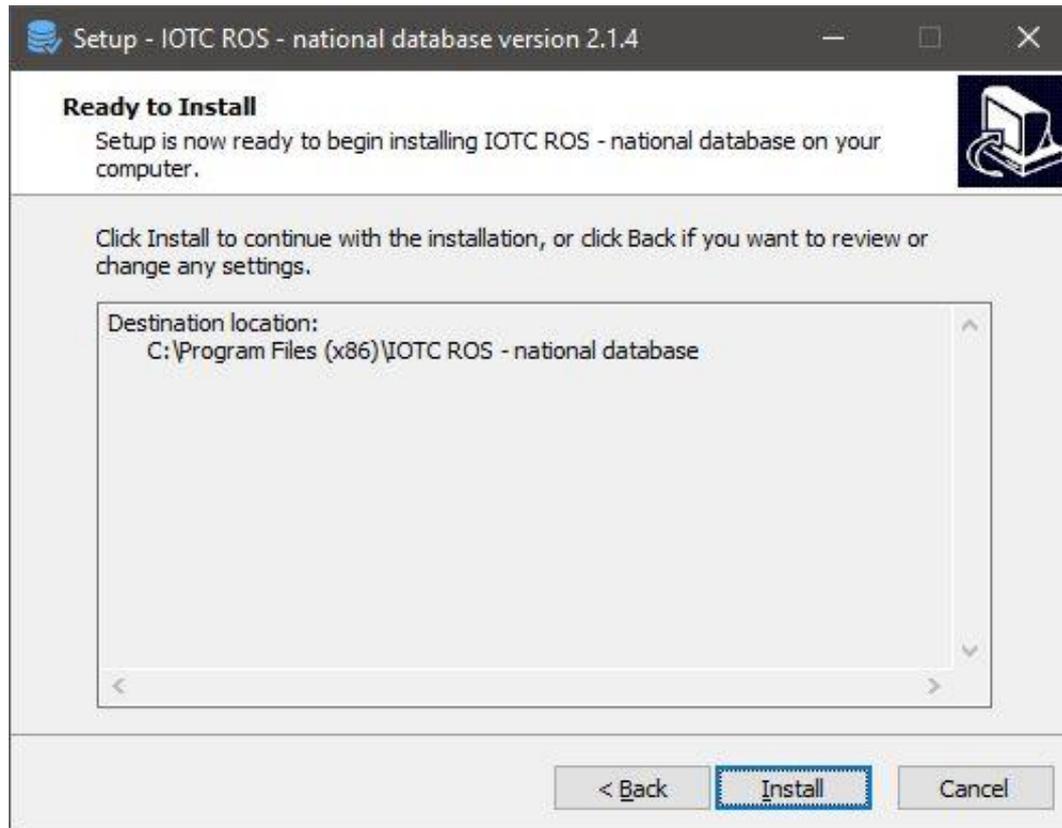

4. Choose whether you want an icon on your desktop or not

# Installing ROS national DB - 3

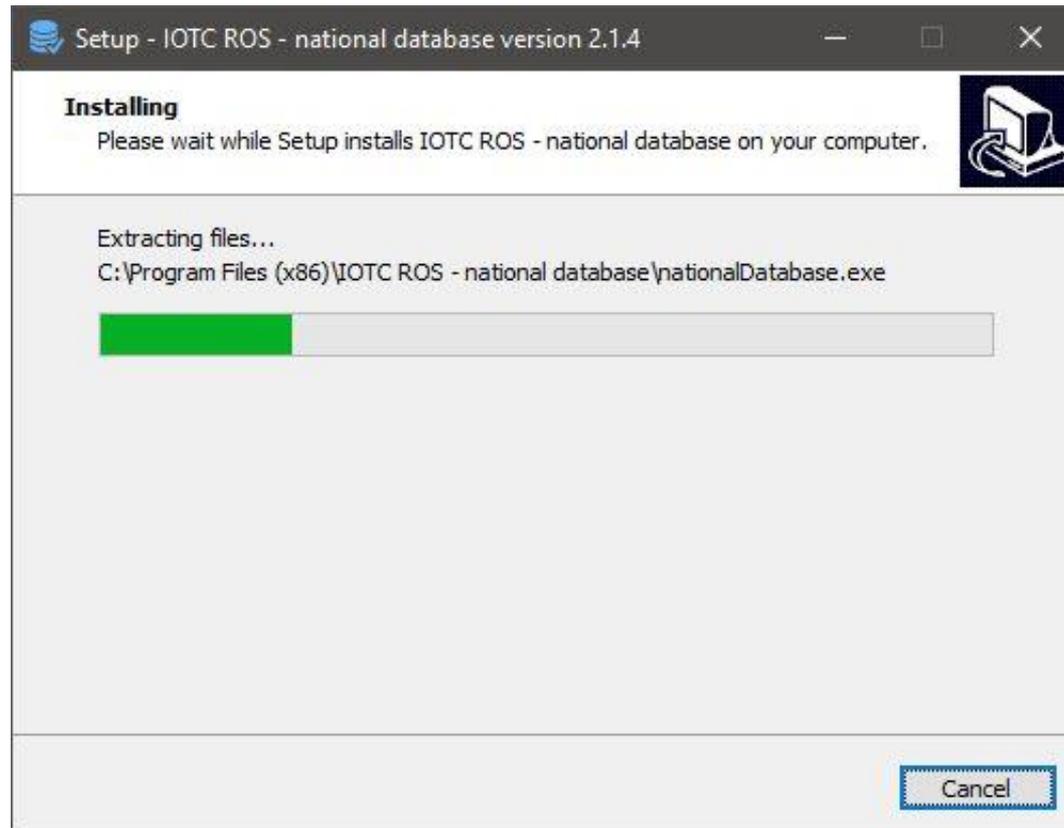

5. Verify that the destination location is as expected and click **Install**

# Installing ROS national DB - 4

5. Wait for the installation to complete

# Installing ROS national DB - 5

7. Once done, you can start the ROS national DB directly from this last screen or by the start menu / quick launch / Desktop icon (if enabled)

## Installing ROS national DB - 6

- When launched, the ROS national DB prompts for a national focal point user credentials (provided by the IOTC Secretariat).
- Please note that the computer running the ROS national DB has to be connected to the Internet for the login to work.**

A screenshot of a web browser window titled "IOTC ROS national database v2.1.4 - Login". The window contains a login form with the IOTC logo on the left and the text "Log-in with your IOTC ROS national focal point credentials" in the center. Below the text are two input fields labeled "Username" and "Password". A "Login" button is positioned below the password field. At the bottom of the form, there is a message: "Please enter your username and password to proceed".
