E-PSM APPLICATION

Welcome in the e-PSM Application. Made of three independent modules, the e-PSM application has been designed and developed to facilitate and assist the Contracting Parties and Cooperating non Contracting Parties (CPCs) of the IOTC to implement the IOTC Resolutions related to Port State Measures (PSM):

- Resolution 10/11 On port state measures to prevent, deter and eliminate illegal, unreported and unregulated fishing
- Resolution 05/03 Relating to the establishment of an IOTC programme of inspection in port (Landing in port by foreign vessels),
- Resolution 14/06 On establishing a programme for transhipment by large-scale fishing vessels (Annex 1 - Conditions relating to in-port transhipment by LSTVs).

Module 1: e-PSM Forms and Processes

The first module, e-PSM forms and processes, is a working and communication platform for the fishing industry, the port States CPCs, the flag State CPCs to implement their responsibilities in terms of Resolution 10/11. As the first step of the PSM process, this module allows the fishing industry to submit electronically to port State CPCs an advance request for entry into port (AREP) to decide whether to authorise or deny the entry of the vessel into its port and communicate this decision to the vessel or to its representative.

Create an Advance Request for an Entry in Port

Log in PSM Form and Processes (Access restricted to CPCs and authorised users)

Module 2: e-PSM Library

The second module, e-PSM library, is an information sharing platform to IOTC CPCs where PSM related information can be found, such as:

- Information on designated ports, designated competent authority in each port State CPC and prior notification period established by each CPC,
- e-PSM application user guides (Industry guide, port State CPCs guide and flag State CPCs guide),
- PSM forms created in the Module 1: Advance Request of Entry into Port (AREP) and Port Inspection Reports (PIR) (Restricted access),
- Documents, technical reports, meeting reports, video on various fisheries topics (e.g. tuna fisheries management, fisheries Monitoring Control and Surveillance (MCS) and port State measures, etc...)
- Internet link to useful internet resources (e.g. vessel movement information, port information, etc...).

Access the public area

Log in e-PSM Library (Access restricted to CPCs)

Module 3: e-PSM Reporting

The third module, e-PSM reporting, is a reports building tool where reports related to the activities of foreign vessels in its port or activities of its flagged vessels in foreign ports can be generated. This module allows CPCs to generate the mandatory report required by Resolution 05/03 (Details of landing of foreign vessels in ports), as well as the mandatory report required by Resolution 14/06 (Details of transhipments of flag vessels in foreign ports).

EPSM LIBRARY

Welcome to the e-PSM Library. The e-PSM library allow you to access to port State measures information such as the user guides to the e-PSM application, the designated port contacts, the flag State contacts, e-PSM forms (Access restricted to CPCs and authorised users), documents and internet resources on port State measures and fisheries management.

User Guides to ePSM

This page allows you to download the user guides developed for different type of users that have responsibilities to implement IOTC port State measures: the fishing industry, flag State CPC and port State CPC.

Forms Search & Query

This page allows you to search and display e-PSM forms (Advance Request of Entry in Port (AREP) and Port Inspections Reports (PIR)) coming from the Module 1 (e-PSM forms and processes).

Documents Search & Query

This page allows you to search for documents, technical reports, meeting reports, video on various fisheries topics (e.g. port State measures, fisheries management, Monitoring Control and Surveillance (MCS), etc...).

Designated Port Contacts

Contracting Parties and Cooperating non Contracting Parties (CPCs) of the IOTC have designated ports that will allow foreign vessels to land or tranship their catches and use port facilities and services. This page allows you to search for designated ports, designated competent authority in each port State CPC, prior notification period established by each CPC and port inspectors.

Listing of referential

This page allows you to find all referentials in use in the e-PSM application.

Useful Links

This page allows you to search useful internet resources on various fisheries topics (e.g. port State measures, vessel movement information, port information, tuna fisheries management, fisheries Monitoring Control and Surveillance (MCS), training resources). They are resources to assist CPCs with the implementation of port State measures and the identification of IUU vessels.

USER GUIDES

The e-PSM application user guides are essential documentation to properly use the e-PSM application and its 3 modules:
- Module 1: e-PSM forms and processes
- Module 2: e-PSM library
- Module 3: e-PSM reporting

This page allows you to download the user guides developed for different type of users that have responsibilities to implement IOTC port State measures: the fishing industry, flag State CPC and port State CPC.

User guide for the fishing industry

The link(s) below allows you to download the user guide(s) for the fishing industry. The guide for the fishing industry provides instructions to vessel agent, vessel captain, vessel owner, vessel operator and any vessel representative involved in the submission of advance request of entry into...
