Direction Nationale des Ressources halieutiques

**Implementation report
IOTC
COMOROS**

**OIRDI ZAHIR ABOUBACAR
DIRECTEUR PECHE ET RECHERCHE HALIEUTIQUE**

CONSERVATION AND MANAGEMENT MEASURES ADOPTED BY THE COMMISSION

Part 1A

The Union des Comores respects the Resolutions adopted by the Commission. But, as our country has not yet developed a national commercial fishing fleet, we do not have the capacity and means to monitor foreign vessels fishing in our EEZ. In this regard, arrangements have been made in the last Fisheries Agreement Protocol signed between the European Union and Comoros to harmonize the aforementioned protocol with the IOTC Resolutions, notably:

- On *Resolution 09/01 On the performance review follow-up*, the Union des Comores has given priority to the development of artisanal fishing. At least 60% of the new agreement are dedicated to the Ministry of Fisheries, in view of developing a National Fisheries Plan aiming at implementing responsible fishing practices.
- On Resolutions *09/02 On the implementation of a limitation of fishing capacity of Contracting Parties and Cooperating non-Contracting Parties*, *09/05 To prohibit the use of large-scale driftnets on the high seas in the IOTC area of competence* and *09/06 On marine turtles*, the new Fisheries Agreement Protocol indicates that: “*fishing vessels respect the recommendations adopted by the Indian Ocean Tuna Commission (IOTC) regarding fishing gears and technical specifications*”.
- On *Resolution 09/03 On establishing a list of vessels presumed to have carried out illegal, unregulated and unreported fishing in the IOTC area*, controls have been carried out on vessels fishing in the Comoros EEZ between January and December 2009: 9 fishing vessels have been randomly inspected during a regional mission carried out under the IOC Regional Fisheries Monitoring Plan. The 9 vessels were all fishing legally.
- On *Resolution 09/04 On a Regional observer scheme*, the Fisheries Agreement provides for deploying observers on board the fishing vessels. Due to the fact that these vessels do not call in Comoros ports, the deployment of observers on board remains problematic. The Agreement indicates also that the vessel master shall fill out a fishing logbook for each fishing period within the Comoros waters. Furthermore, all non licensed fishing vessels passing through the Comoros EEZ have to declare their passage.

Part 1 B

Actions taken, under national legislation, to implement conservation and management measures adopted by the Commission in previous Sessions, and which have not been reported previously:

Since 2005, Comoros implement the conservation and management measures adopted by IOTC, under the framework of the Fisheries Agreement signed with our partners. Each year, the Fisheries Administration takes into account the Resolutions adopted by the Commission in delivering new fishing licenses.

Part 2

Regarding Part 2, the Resolutions pertaining to Coastal State Control apply to Comoros, which is a signatory of the Fisheries Agreement. The Union des Comores aims at becoming a Flag and Port State, and to develop a national commercial fishing fleet.

At the moment, the foreign vessels authorized to fish in the Comoros EEZ do not tranship nor call in our ports for refuelling or resupplying. Statistical data pertaining to these vessels are submitted by their operators.

You will find below basic information on the licensed vessels fishing in the Comoros EEZ (Resolution 07/04).

Regarding Resolution 07/01, there has been no case detected where natural or legal persons have engaged in activities that undermine IOTC conservation and management measures.
