5. Qualité de la vérification du carnet de pêche

Les fonctionnaires de la DGCF vérifient chaque carnet de pêche soumis par le navire de pêche. Il y a 6 points d'évaluation du carnet de pêche, tels que la zone de pêche, le nombre d'opérations de pêche-calées, le volume et la composition des captures, les espèces pêchées, la capture par opération de pêche-calée et le SSN. Le pêcheur recevra une notification par e-mail (avec copie au port de pêche) afin de réviser ou de soumettre des commentaires si la personne chargée de la vérification détecte des erreurs présumées dans le carnet de pêche, par exemple si le nombre d'opérations de pêche-calées est bien inférieur au nombre de jours de navigation.

6. Qualité de la vérification du SSN

Le SSN est une obligation imposée aux navires de pêche de plus de 30 TB. Le SSN est géré par la DG de surveillance ; la DG des pêches de capture a accès aux données de SSN en vue d'évaluer l'application par les pêcheurs. La vérification des carnets de pêche recouvre les informations spatiales sur les zones de pêche (d'après les carnets de pêche) et les données de SSN. La DGCF évalue l'activation du SSN au cours des opérations de pêche. La DG de surveillance préviendra également le propriétaire du navire de pêche si le SSN est inactif. Le MMAF applique une étroite supervision du SSN.

Au cours de la période 2019-2020, tous les navires de pêche et les navires partenaires de plus de 30 GT ayant réalisé des transbordements en mer ont activé le SSN durant les opérations.

7. Autres commentaires

Le projet expérimental pour les transbordements en mer pour les navires en bois indonésiens est très utile et favorablement accueilli par les acteurs des entreprises de pêche car il peut maintenir la qualité des captures en vue d'obtenir une valeur économique compétitive sur le marché. Le Gouvernement d'Indonésie a mis en œuvre un programme d'observateurs, le carnet de pêche et le SSN en tant qu'instrument pour assurer la supervision de ces projets.

8. Conclusion(s)

L'Indonésie propose de rendre permanent ce projet expérimental pour l'Indonésie dans le cadre des activités de transbordement en mer reconnues par la CTOI.
