

IMPLEMENTATION OF REPORTING OBLIGATIONS OF NOMINAL CATCH DATA – RESOLUTION 18/07

Prepared by: IOTC Secretariat, 23 APRIL 2022

PURPOSE

To provide the Compliance Committee with an update on the current level of implementation of IOTC Resolution 18/07 on *Measures applicable in case of non-fulfilment of reporting obligations in the IOTC*.

Paragraph 3. Following the review carried out by the Compliance Committee, the Commission at its annual session, according to the guidelines attached (**Annex I**), and after having given due consideration to the relevant information provided by the concerned CPCs in these cases, may consider to prohibit CPCs that did not report nominal catch data (exclusively), including zero catches, for one or more species for a given year, in accordance with the Resolution 15/02, paragraph 2 (or any subsequent revision), from retaining such species as of the year following the lack or incomplete reporting until such data have been received by the IOTC Secretariat. Priority shall be given to situations of repeated non-compliance. Any CPC unable to meet these reporting obligations owing to engagement in civil conflict shall be exempt from this measure.- The CPC concerned will work with the IOTC Secretariat to identify and implement possible alternative methods for data collection, using established FAO data collection methods.

BACKGROUND

IOTC Circular 2018-11, reminded CPCs to provide information on their recorded catches, including zero-catches or non-applicability of reporting requirements, by gear and species for the year 2016.

In its deliberations in 2018, the Compliance Committee **RECOMMENDED** that the Secretariat provide a list of CPCs not meeting the reporting requirements for nominal catch per species and gears for future meetings.

In its deliberations in 2019, the Compliance Committee **RECOMMENDED** to the Secretariat to include this measure in the compliance report and **NOTED** the engagement of all present members to transmit this table for next year. This reporting requirement is now included in individual CPCs Compliance Report and a summary of the reports received by the IOTC Secretariat is presented in this document.

DISCUSSION

IMPLEMENTATION OF REPORTING OF CATCH DATA

In accordance to IOTC Resolution 18/07 (previously Resolution 16/06), starting in 2016 and annually thereafter, CPCs are required to submit total catch data to the IOTC Secretariat in accordance with the Resolution 15/02 and the Scientific Committee template, including zero catches.

For the 2021 reporting cycle, that is, for data pertaining to the year 2020, twenty CPCs (Australia, China, Comoros, the European Union, India, Indonesia, Iran, Japan, Kenya, Korea, Rep. of, Madagascar, Malaysia, Maldives, Mauritius, Philippines, Seychelles, South Africa, Sri Lanka, Thailand and the United Kingdom) have submitted their nominal catch matrices. It should be noted that the Philippines which has confirmed that it did not have vessels operating in the IOTC Area in 2020, has submitted its catch matrix.

Nine CPCs (Bangladesh, Eritrea, Mozambique, Oman, Pakistan, Somalia, Sudan, Tanzania and Yemen) did not submit their nominal catch matrices. Therefore, these nine CPCs are at fault with their nominal catch reporting obligations, including reporting on zero catches.

Two CPCs (France (OT) and Senegal) confirmed that they did not have fishing vessel operating in the IOTC Area in 2020.

Unlike in previous years where there were variations in the level of completeness of the information provided by some CPCs, for some species and gear types, for the 2021 reporting cycle there was a marked increase in the level of completeness for reporting forms received. Only one CPC (Seychelles) submitted a catch matrix that is not fully in accordance to IOTC Resolution 18/07 (for zero catches).

The tables in Appendix 1, below, summarises the number of CPCs reporting positive nominal catch data by gear and species for 2020 (Table 1). Tables 2 - 21, provide individual CPCs record of reports for nominal catch data by gear and species, for 2020 for those CPCs that have submitted their report.

RECOMMENDATION/S

- That the CoC19 **NOTE** that only twenty CPCs submitted a catch matrix in accordance to IOTC Resolutions 18/07.
- That the CoC19 **FURTHER NOTE** that three CPCs (France (OT), Philippines and Senegal) did not operate any fishing vessel in the IOTC Area in 2020.
- That the CoC19 **RECOMMENDS** to the Commission the course of action, as provided under IOTC Resolution 18/07, for CPCs that have not reported information in accordance to IOTC Resolutions 18/07.

Appendix 1

Table 1. Number of CPCs reporting on nominal catch data by species and gear type, in accordance to IOTC Resolutions 18/07 (for zero catches), for 2020.
