[Health Information for travellers](#)

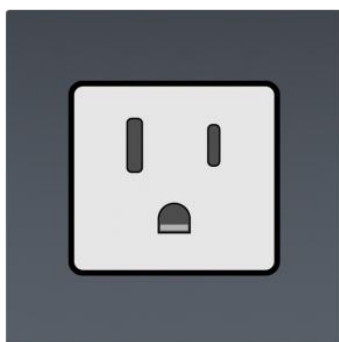

#### 6. INTERPRETATION

The meeting will be held in English.

#### 7. ELECTRICITY

The voltage in Thailand is 220 Volts.

Type B

## **8. TELEPHONE SERVICE**

### ***National phone calls***

Most land line numbers in Thailand are 7-digits long, whilst mobile phones tend to be 8-digits long. However, you may find 6, 7, 8 and 9 digit numbers too.

Before dialling a land line number, you will have to add 0 (Subscriber trunk dialling) and the area code. The area code for Bangkok is 2. So to make a national call to Bangkok, you would dial 0+2+ the 7-digit number land line number. Before dialling a mobile number you will have to add 08.

You are usually charged 3 Baht per call to a local land line number. The lowest rates for domestic long distance land line calls are between 10pm and 7am. If you dial 1234 + number, you will be using a new data switching network, and rates will be cheaper than standard rates.

### ***International calls***

The country code for Thailand is +66. To dial to a fixed number in Thailand from a foreign country dial: 00 (IAC-International Access Code) + 66 + area code + phone number.

To dial a foreign number from Thailand you will have to dial one of the prefix numbers before you dial the country code. The prefix numbers are 001, 004, 005, 006, 007, 008 or 009. So, to dial to the US you should dial 009 + the country code + area code + the phone number.

To get assistance from an international operator, dial 110.

## **9. INTERNET**

Wi-Fi and Internet facilities will be available in the training room during the training hours. Internet service outside the training will be at participant's own expense.

## **10. TOURISM**

Information on tourism and other information are available at:

<http://www.thailand-guide.com/>
