## **Guidance and recommendations for preparing IOTC Resolutions and Recommendations.**

PREPARED BY: IOTC SECRETARIAT<sup>1</sup>, 6 APRIL 2024

---

### **PURPOSE**

To provide the Compliance Committee with the opportunity to consider the *Guidance and recommendations for preparing IOTC Resolutions and Recommendations* (Annex 2 of the Report *Legal Scrub of IOTC Resolutions and Recommendations*), which should be used by Members when drafting proposals for Resolutions and Recommendations for the Commission.

### **BACKGROUND**

Following the review of the progress on the legal scrubbing of IOTC Resolutions, the WPICMM05 made the following recommendation related to the legal scrubbing. It should be noted that that the review of the WPICMM considered part of the document and excluded the Annex 2 of the REPORT *Legal Scrub of IOTC Resolutions and Recommendations*.  
:

101. The WPICMM05 **ENDORSED** the proposals of the legal scrubbing and **RECOMMENDED** Compliance Committee 19 be presented the version of the legal scrubbing, where suggested changes opposed by CPCs are removed.

At its Nineteen Session, the Compliance Committee reviewed the progress on the legal scrubbing of IOTC Resolutions and made the following recommendation:

IOTC–2022–CoC19–R[E] – Paragraph 141

The CoC19 **RECOMMENDED** that the Commission consider adopting the results of the legal scrubbing in two packages of Resolutions over its Sessions in 2023 and 2024.

At its Seventh Session the WPICMM made the following recommendation:

IOTC–2024–WPICMM07–R[E] – Paragraph 69

The WPICMM07 **RECOMMENDED** the Compliance Committee to review the Guidance and Recommendations for Preparing IOTC Resolutions and Recommendations (Annex 2 of the Legal scrubbing of IOTC Resolutions, [IOTC-2020-WPICMM03](#)), and the additional agreed terms and definitions of the Glossary, with a view to endorse them.

## DISCUSSION

The **objective** of legal scrubbing was to support IOTC on matters related to strengthening the harmonised implementation of and compliance with the Resolutions adopted by the Commission by conducting a technical legal scrubbing of all active Resolutions and Recommendations. IOTC Resolutions and Recommendations in this legal scrubbing study appear in the 2019 IOTC Compendium of Active Resolutions.

To support the legal scrubbing, this report also:

- provides guidance on technical legal drafting of future Resolutions and Recommendations;
- reviews the comments on the draft Glossary made by CPCs at WPICMM02 and propose definitions accordingly;
- reviews the IOTC Scientific Glossary and proposes updates; and
- makes recommendations on a mechanism or process that provides for the implementation of the outcome of the legal scrub on a continuing basis in relation to the preparation of proposals for future Resolutions and Recommendations.

The legal scrub was conducted for each Resolution and Recommendation and was presented in the **Annex 1** of the report *Legal Scrub of IOTC Resolutions and Recommendations*. Most of the attention regarding the legal scrubbing report was given to the Annex 1 which contain the legal scrub of the 2019 IOTC Compendium of Active Resolutions.

At its Seventh Session the WPICMM07 noted that little attention was given to the Annex 2 of the REPORT *Legal Scrub of IOTC Resolutions and Recommendations*, and therefore recommended the CoC21 to consider the Annex 2 with the objective to endorse it, as a stand-alone guide to support IOTC on matters related to strengthening the harmonised implementation of and compliance with the Resolutions adopted by the Commission.

The *Guidance and recommendations for preparing IOTC Resolutions and Recommendations* is consistent with the IOTC Agreement, international best practices and the FAO style guide. It details the inconsistencies and inaccuracies in existing Resolutions and Recommendations concerning (a) IOTC-related matters, (b) legal responsibilities, (c) references/use of terms and (d) formatting, and recommends for a range of items under each of these four headings the proper approach and language. It clearly sets out the errors and approaches found in existing Resolutions that must be avoided in future.

This paper presents, in Appendix 1, the *Guidance and recommendations for preparing IOTC Resolutions and Recommendations* (Annex 2 of the Report *Legal Scrub of IOTC Resolutions and Recommendations*).

## RECOMMENDATIONS

That the CoC21:

- 1) **NOTE** paper IOTC–2024–CoC21-12b, which presents the *Guidance and recommendations for preparing IOTC Resolutions and Recommendations*,
- 2) Consider to **ENDORSE** the *Guidance and recommendations for preparing IOTC Resolutions and Recommendations*, and consider to **RECOMMEND** that the Commission adopts, as a stand-alone document, the *Guidance and recommendations for preparing IOTC Resolutions and Recommendations*, presented in Appendix 1.

## Appendix 1

### **RECOMMENDATIONS ON A PROCESS FOR THE PREPARATION OF PROPOSALS FOR FUTURE IOTC RESOLUTIONS AND RECOMMENDATIONS**

This report indicates a need for an agreed approach to the preparation and adoption of Resolutions and Recommendations to ensure they are clear and consistent. Most importantly, mindful of the legally binding nature of Resolutions and the need for all CPCs to uniformly implement their provisions into national legislation and procedures, they should be legally robust. In this regard, they should accurately reflect relevant international instruments, the IOTC Agreement, legal responsibilities, proper terminology, consistent formatting and legal best practices.

It is understood that the process for preparation of proposed Resolutions and Recommendations, or amendments, requires that they be submitted to the Secretariat in advance of the Sessions, and before distribution to CPCs.

The process for their adoption Sessions can be unpredictable due to the need for negotiation, and that agreement may only be reached as time runs out for further discussion or revision. There are added challenges where: legal advice may not be available or legal experts may not be familiar with the wide range of IOTC Resolutions, other relevant international instruments, IOTC Agreement, terminology or any legal drafting guidelines that may be agreed; and the mother tongue of many CPCs is not English or French.

Mindful of this situation, a three-step process for the preparation and adoption of Resolutions and Recommendations is recommended for consideration.

- (1) CPCs should use guidelines, based on those in Annex 2, to prepare its proposed draft or amendments.
- (2) A brief time period should be designated after receipt of the draft and prior to distribution to CPCs for the Secretariat to arrange a preliminary “legal scrub” of the proposal.
- (3) Final legal input should be given at the Session, if possible, in the form of advice during discussions, a brief legal vetting (“scrub”) after negotiation and prior to adoption, or other as may be agreed.

The legal advice for all steps should take into account the need for consistency within the Resolution or Recommendation, the legal applicability to CPCs, consistency with other Resolutions or Recommendations, the IOTC Agreement, international instruments and as appropriate other RFMOs, terminology, any legal drafting guidelines that may be agreed and terminology based on the draft Glossary and the Scientific Glossary.

**GUIDANCE AND RECOMMENDATIONS FOR PREPARING IOTC RESOLUTIONS AND  
RECOMMENDATIONS**

Guidance and recommendations in relation to technical legal drafting of future Resolutions and Recommendations, consistent with the IOTC Agreement, international best practices and the FAO style guide, is shown below. It details the inconsistencies and inaccuracies in existing Resolutions concerning IOTC-related matters, legal responsibilities, references/use of terms and formatting, and recommends for each the proper approach and language. It clearly sets out the erroneous use of terms and approaches found in existing Resolutions that must be avoided in future.

<b>Subject and guidance</b>	<b>Recommendation</b>
	<p>It is based on standard practice: the common names of fishes by convention have been treated as common nouns, not proper nouns, and are accordingly spelled in lower case.</p> <p>This is the WCPFC model, others (IOTC, ICCAT etc) have no model and use upper case and lower case for the names of species inconsistently.</p>
