3. The description of the protocols supporting observer programs (at sea) and sampling schemes (artisanal vessel landings), reported to the IOTC Scientific Committee:

YES – Complete

4. Describe the protocols supporting observer programs (at sea) and the sampling schemes (artisanal vessel landings):

a. Protocols - Observer programmes at sea: Scientific Observer programme is implemented for all national industrial fisheries. For the linefishery the scientific observer programme has been carried out since year 1998 while for the national longline fleet it has been implemented since 2015. Improvements in the observer program are being expected in the following years as Mozambique is willing to participate in the pilot project on regional observer scheme.

b. Protocols- Sampling schemes for artisanal vessel landings:

For artisanal fisheries a sampling program started on experimental basis in 1997. The system was expanded and became adopted as the official source of artisanal fisheries statistics of Mozambique. The system is based on a random-stratified sampling at landing sites defined as fishing centres. The Data collected include catch by species, effort and length frequency of the dominant species. Not all fishing centres are sampled. The geographical extension and complexity of the artisanal sector, which primarily do not target IOTC species, associated with logistical (financial) limitations for the implementation of the sampling system are the primary causes affecting the effectiveness of data collection. To improve the coverage and the quality of fisheries data there is a pilot implementation of the FAO ARTIFISH data collection framework which is expected to replace the actual system that relay on PESCART database. As ARTIFISH does not secure collection of biological data, this swift will imply a review of the research plan by IIP and, to complement the primary catch and effort statistics generated by ARTIFISH.

5. Complete the below table or upload your report on the coverage achieved by gear type, in the UPLOAD section:

a. At sea - all fishing vessels of 24 meters length overall and above, and fishing vessels under 24 meters operating outside the EEZ:
