Resolution 12/04 On the conservation of marine turtles

Reporting obligation: Report on progress of implementation of Resolution 12/04 in 2024
- Deadline: 12/2/2025

1. Did you submit the data/report/information of this reporting obligation?

- YES - Submitted

2. Reporting the progress of implementation of Resolution 12/04:

- YES - Reporting progress in section 3 below

3. Report on the requirements of the Resolution 12/04:

a. Collect (through logbooks and observer programs) and provide to the Scientific Committee all data on their vessels interactions with marine turtles,

Furnish information to the Scientific Committee on successful mitigation measures and other impacts on marine turtles (such as the deterioration of nesting sites & swallowing of marine debris):

- Yes
 Not applicable: France-OT has no flagged fishing fleet operating in the IOTC area of competence. However, as part of its National Scientific report, France-OT has reported incidental catches of marine turtles detected by France-OT observers on board foreign-flagged (tuna purse seiners) vessels licenced to fish in the TAAFs. Decree No. 2021-47 of 06 July 2021 regulating tuna and other pelagic species fisheries in the Scattered Islands Economic Exclusive Zones (EEZs) provides that: "Electronic or paper logbooks provided to the supervisory administration must absolutely report any incidental catch and bycatch, involving in particular sharks, rays, marine turtles, seabirds and marine mammals for each of the fishing trips completed".

b. Require fishermen to bring aboard, if practicable, any captured hard shelled turtle that is comatose or inactive as soon as possible and foster its recovery, including aiding in its resuscitation, before safely returning it to the water. Ensure that fishermen are aware of and use proper mitigation and handling techniques and keep on board all necessary equipment for the release of turtles:

- Yes

Decree 2021-47 provides for the general following measures: “It shall be prohibited to target, intentionally harvest and retain on board the following marine turtles: flatback turtle (*Natator depressus*), green turtle (*Chelonia mydas*), hawksbill sea turtle (*Eretmochelys imbricata*), leatherback turtle (*Dermochelys coriacea*), loggerhead turtle (*Caretta caretta*), and Olive ridley turtle (*Lepidochelys olivacea*)”. - Obligation for operators of vessels to record all incidents involving marine turtles during fishing operations in their logbooks and report such incidents to the appropriate authorities. They shall keep on board all necessary equipment in order to facilitate the appropriate handling of marine turtles and use it as necessary. Marine turtles must be released at sea as quickly as possible. Handling shall be done in a way to reduce animal stress to a minimum and maximise the likelihood of their survival. The equipment on board is designed to remove the hook or cut the lines, nets or hooks in which sharks and sea turtles are entangled.

c. For gillnet vessels: Require vessel to record all incidents involving marine turtles in the logbooks and report incidents to authorities of the CPC:

- Yes

This fishing practice is not used in France-Territories waters.

d. For longline vessels

(a) Ensure that longline vessels carry line cutters & de-hookers to facilitate the handling and release of marine turtles caught or entangled

(b) Encourage use of whole finfish bait;

(c) Require vessel to record all incidents involving marine turtles in the logbooks and report incidents to authorities of the CPC.

- Yes

Decree 2021-47 provides for the following measures: Longline vessels that fish for IOTC species are required to carry on board the following tools to facilitate the handling and release of sharks, rays, marine turtles, seabirds and marine mammals caught or entangled and reduce the time involved in these operations: -lifting device; line-cutters; bolt-cutters; - chain mail gloves; de-hookers. When handling and releasing sharks, rays, marine turtles, seabirds and marine mammals caught or entangled, the longliner crew shall follow the IOTC guidelines while taking the safety of the crew into due consideration.

e. For purse seine vessels:

(a) Ensure that vessels:

(i) Avoid encirclement of marine turtles, if a marine turtle is encircled/ entangled, take measures to safely release the turtle.

(ii) Release all marine turtles observed entangled in fish aggregating devices (FADs) or fishing gear.

(iii) If a marine turtle is entangled in the net, stop net roll as soon as the turtle comes out of the water; disentangle the turtle without injuring it before resuming the net roll; and assist the recovery of the turtle before returning it to the water.

(iv) Carry and employ dip nets to handle turtles.

(b) Encourage vessel to adopt FAD designs which reduce the incidence of entanglement of turtles;

(c) Require vessel to record incidents involving marine turtles in the logbooks and report incidents to authorities of the CPC.

- Yes

Decree 2021-47 provides for the following measures: Any shark, ray and turtle entangled in the purse seine must be immediately disentangled. They must not enter into the power-block. Any shark, ray and turtle caught shall be released at sea preferably from the deck rather than from the orlop deck while complying with good practices and taking the safety of the crew into due consideration. Drifting FADs at sea shall be constructed with biodegradable materials and in a way to minimise the risk of non-targeted species or turtle entanglement, both in the upper and submerged part of the FAD. Encirclement of marine turtle shall be prohibited. If a turtle is incidentally encircled or entangled on or beneath the FAD, it shall be released as soon as possible in accordance with the guidelines included in the IOTC identification cards.

f. CPCs to undertake research trials of circle hooks, use of whole finfish for bait, alternative FAD designs, alternative handling techniques, gillnet design and fishing practices and other mitigation methods which may improve the mitigation of adverse effects on turtles.

- Yes
France undertakes research projects that do not fall under France Territories. However, these actions fall under the National Plan of Action (NPA) on marine turtles in the Indian Ocean applicable to France-Territories EEZs.

g. CPCs continue to undertake research and development to improve the mitigation of adverse affects on marine turtles & provide research outcomes to the Scientific Committee.

- Yes
France undertakes research projects that do not fall under France Territories. However, these actions fall under the National Plan of Action (NPA) on marine turtles in the Indian Ocean applicable to France-Territories EEZs.

h. Collaborate with the IOSEA and take into account the IOSEA MoU

- Yes
Since 2020. France is a signatory of the Memorandum of Understanding on the Conservation and Management of Marine Turtles and their Habitats of the Indian Ocean and South-East Asia (IOSEA) concluded in 2001 under the auspices of the CMS (Convention for Migratory Species) This involvement entails the implementation of a conservation plan for these species in the French Territories of the Indian Ocean.

Resolution 14/05 Concerning a record of licensed foreign vessels fishing for IOTC species in the IOTC area of competence and access agreement information
