## 2. Management Standards

2.16-Obj210	Res. 19/01 (5-15)(12) (2023)	Catch limits - Nominal catch & Report methods for achieving YFT catch reductions	12/2/2025	P/C	N/C2	LEG: YES – Regulations for the establishment of the National IOTC Commission, Article 3, paragraphs 2 & 5. STD: NO - Exceeding quantitative limit established by the Commission in two or more consecutive year. SP: YES - Provided & described for i) ii) iii).	Due to the decline in the catch of yellowfin tuna in recent years, the catch amount for this YFT in 2023 around 37,350 tons, which shows a significant decrease compared to the past 3 years and also compared to the baseline year around 46,216 tons. It is important to note that Paragraphs 5, 6, and 7 of Resolution 19/01 specify catch limits for the purse seine, gillnet, and longline methods have been established. In recent years, Iran has experienced a decrease in catches for all of these fishing methods. However, it raises the question of why N/C2 with the resolution has not been taken into account in the assessment.	- -

Furthermore, in line with Paragraph 20 of Resolution 19/01, Iran has taken measures in recent years to reduce yellowfin tuna catch. One of these measures has been encouraging fishermen to convert to selective fishing methods, such as longline, which is temporarily used during certain seasons of the year. Consequently, yellowfin tuna catches have significantly decreased over the past two years, as reflected in Iran's Scientific Committee report.</p>
