2) The operator of an Omani fishing vessel carrying out fishing on floating fish aggregators (DFADs), equipped with motorized buoys for the purpose of assembling targeted tuna species, shall not, in the jurisdiction of the Indian Ocean Tuna Commission, deploy an associated supply or support vessel or use or cause the floating fish aggregator to be deployed unless:

A float equipped with devices shall be attached to this device .

(b) Not to use any other type of buoy, such as wireless buoys .

(c) Any buoy equipped with devices connected to such device shall have a unique physical reference number identifying the manufacturer or buoy .

(d) The unique registration number of the vessel in the Indian Ocean Tuna Commission is clearly visible.

(e) Fully implement any marking scheme for drift fish collection devices approved by the Indian Ocean Tuna Commission.

**Article 24 -Prohibition on the Use of Artificial Lights for Fish Aggregation**

1. The use, installation, or operation of artificial lights, whether surface or submerged, for the purpose of attracting or aggregating tuna and tuna-like species through Fish Aggregating Devices (DFADs) beyond territorial waters is strictly prohibited. The use of artificial lights on DFADs is also prohibited, in accordance with applicable international regulations.

2. Intentional fishing activities conducted around vessels or DFADs equipped with artificial lights intended to attract tuna and tuna-like species are prohibited.

DFADs equipped with artificial lights found within the area of competence must, as far as possible, be removed and brought back to port.

3. This prohibition does not apply to navigation lights or lights necessary to ensure safe working conditions aboard vessels.

Requirement submitted ? true the 09 March 2026 - 07:43 // Compliance assessment : Not Assessed

#### 1. Did you submit the data/report/information of this reporting obligation?

- NIL Report / Not Applicable - CPC has no fishing vessels on the IOTC Record of Authorised Vessels in 2025 AND CPC is not a coastal State of the IOTC Area of Competence.  
 NO - Not submitted  
 YES - Submitted

## 2. Reporting the progress of implementation of Resolution 12/04:

YES - Reporting progress in section 3 below

NO - NOT reporting progress

NO - NIL report - No vessels on the IOTC Record of Authorised Vessels AND no artisanal/coastal fisheries in 2025

## 3. Report on the requirements of the Resolution 12/04:

a. Collect (through logbooks and observer programs) and provide to the Scientific Committee all data on their vessels interactions with marine turtles,

Furnish information to the Scientific Committee on successful mitigation measures and other impacts on marine turtles (such as the deterioration of nesting sites & swallowing of marine debris):

YES - 2025 progress are reported below  NO - No progress in 2025

NO - 3.a) is not applicable - No vessels on the IOTC Record of Authorised Vessels (RAV)

### Progress of implementation:

-

b. Require fishermen to bring aboard, if practicable, any captured hard shelled turtle that is comatose or inactive as soon as possible and foster its recovery, including aiding in its resuscitation, before safely returning it to the water. Ensure that fishermen are aware of and use proper mitigation and handling techniques and keep on board all necessary equipment for the release of turtles:

YES - 2025 progress are reported below  NO - No progress in 2025

NO - 3.b) is not applicable - No vessels on the IOTC Record of Authorised Vessels (RAV)

### Progress of implementation:

c. For gillnet vessels: Require vessel to record all incidents involving marine turtles in the logbooks and report incidents to authorities of the CPC:

YES - 2025 progress are reported below  NO - No progress in 2025

NO - 3.c) is not applicable - No gillnet vessel on the IOTC Record of Authorised Vessels (RAV)

### Progress of implementation:

Oman has no gill netters vessels

d. For longline vessels

(a) Ensure that longline vessels carry line cutters & de-hookers to facilitate the handling and release of marine turtles caught or entangled

(b) Encourage use of whole finfish bait;

(c) Require vessel to record all incidents involving marine turtles in the logbooks and report incidents to authorities of the CPC.

YES - 2025 progress are reported below  NO - No progress in 2025

NO - 3.d) is not applicable - No longline vessel on the IOTC Record of Authorised Vessels (RAV)

### Progress of implementation:

-

## e. For purse seine vessels:

(a) Ensure that vessels:

(i) Avoid encirclement of marine turtles, if a marine turtle is encircled/ entangled, take measures to safely release the turtle.

(ii) Release all marine turtles observed entangled in fish aggregating devices (FADs) or fishing gear.

(iii) If a marine turtle is entangled in the net, stop net roll as soon as the turtle comes out of the water; disentangle the turtle without injuring it before resuming the net roll; and assist the recovery of the turtle before returning it to the water.

(iv) Carry and employ dip nets to handle turtles.

(b) Encourage vessel to adopt FAD designs which reduce the incidence of entanglement of turtles;

(c) Require vessel to record incidents involving marine turtles in the logbooks and report incidents to authorities of the CPC.

YES - 2025 progress are reported below  NO - No progress in 2025

NO - 3.e) is not applicable - No purse seine vessel on the IOTC Record of Authorised Vessels (RAV)

### Progress of implementation:

-

f. CPCs to undertake research trials of circle hooks, use of whole finfish for bait, alternative FAD designs, alternative handling techniques, gillnet design and fishing practices and other mitigation methods which may improve the mitigation of adverse effects on turtles.

YES - 2025 progress are reported below       NO - No progress in 2025

**Progress of implementation:**

Oman is a member of the IOSEA, and present every year its National Report to this International Convention. Please see Reports of Oman submitted in 2024.

Futhermore, on top of the offical reports and follow up, there are several conservation organizations working in Oman to protect these

endangered species, namely the Environment Society of Oman (ESO), Five Oceans Environmental Services, and the Marine Research Foundation. These groups aim to raise awareness about the impact of human activities on turtle nesting grounds and educate about conservation efforts on an individual level. They also work closely with government stakeholders such as the Ministry of Environment and Climate Affairs and the Ministry of Agriculture and Fisheries Wealth. Conservation activities can also have tangible economic benefits for local residents; for example, ESO's Turtle Research and Conservation project on Masirah Island primarily employs local residents. The Ras al Jinz Turtle Reserve was established in 2008 as an eco-tourism project whose revenue helps conserve green turtle nests. Leaders in sea turtle conservation in Oman are hopeful about the prospects of the species' revival and look to the successes of similar historical efforts. The Ras al Jinz Turtle Reservewas established in 2008 as an eco-tourism project whose revenue helps conserve green turtle nests. **g. CPCs continue to undertake research and development to improve the mitigation** of adverse affects on marine turtles & provide research outcomes to the Scientific Committee.

YES - 2025 progress are reported below       NO - No progress in 2025

**Progress of implementation:**

**The objectives of this programme are:**

To undertake regular beach surveys on Masirah Island to record and monitor population trends, nesting activity and threats to nesting turtles.

To define and implement initiatives designed to mitigate threats to the sea turtle population nesting on Masirah.

To advocate for changes at the local and government level that will support sea turtle conservation.

To increase education, community engagement and support for wider sea turtle awareness across Oman. Species of sea turtles found in Oman are threatened to various degrees on the IUCN Red List of Threatened Species and face a high risk of extinction in the wild. Threats including extensive coastal development, light pollution, beach driving, bycatch, ghost fishing, plastic pollution and climate change, are putting significant pressure on the survival of sea turtles.

In recent years, a declining trend in nesting numbers of loggerhead sea turtles has been observed on Masirah Island, representing a statistically significant 79% decline, which is believed to have occurred within a single loggerhead generation.

ESO, in collaboration with the **Environment Authority (EA)**, has been working to counteract this loss, through conserving the species, maintaining a healthy marine environment, and preserving the socioeconomic balance of communities. This long term programme has been funded by the **US Fish and Wildlife Service** and implemented with the help of international and local collaborators including **Ocean Ecology Network, Five Oceans Environmental Services LLC** and **Future Seas Global SPC**.

Through dedicated field surveys, our field teams monitor seasonal nesting activities and beach disturbances, enabling us to accelerate our knowledge and understanding of turtle biology, ecology and conservation needs. This programme has also spear-headed a range of activities to tackle the threats these turtles face including:

- Dedicated net clean-ups ahead of turtle nesting seasons in an attempt to mitigate the threat of entanglement and ingestion for nesting females and hatchlings.
- Awareness videos designed to raise awareness about the correlation between a healthy ocean and a healthy community.
- Community outreach programmes with children, women's groups, fishermen and other community leaders.

Most recently, we have expanded our work to include work on light pollution and initiated a programme for university students and recent graduates with an environmental biology degree aimed at exposing them to conservation-relevant science.

**Artisanal (coastal) fisheries - Measures taken, implementation progress:**

As announced to the 2024 CoC and the 2024 Commission, and lately as presented to the WGDCS in Capetown last year in November 2024, and confirmed through Shanghai meeting in 2025, Oman has taken relevant measures to improve the data collection, and to review its current data collection and statistics system with a view to restart to report to the IOTC in accordance with IOTC resolutions. In the last meeting of the 26th Session of the Working Party on Tropical Tunas Data Preparatory Meeting, Oman reported that "is internally reviewing its sampling protocol, with adjustments to data from 2014 where catches may have been underestimated", in particular, in relation to yellowfin catches, as was included in the Minutes of the Meeting.

**Industrial fisheries - Measures taken, implementation progress:**

please see measures taken by the Ministry in recent months and to be taken as proposed by the External Data Expert (check section on artisanal, that also apply to industrial).

In this respect MAFWR hired the services of an external data expert, a senior fisheries consultant in fisheries data and statistics. His terms of reference were to prepare and present a Preliminary Report at the 26th Session of the WPTT (Seychelles, 28 October – 2 November 2024), conduct a retrospective data analysis for 2014-2023 and present a full Report at the IOTC Working Party on Data and Statistics (WPDCS) at the end of November 2024.

A full report was presented at the WP of Data Collection and Statistics that took place in Cape Tome at the end of November 2024. Since then and until now, the Department of Fisheries Statistics and Information and the Directorate General of Fisheries Research have been working on several tasks that stemmed from the Cape Town meeting as well as from IOTC feedback relating to Oman's data submissions in June 2025.

The Consultant travelled to Oman in September 2024 and conducted a first review of the national fisheries statistical programme. The result of this visit was a Preliminary Report which was presented in video-conference at the 26th Session of the WPTT that took place in Seychelles during 28 October–2 November 2024. Next, the Consultant completed the system review and the retrospective analysis and prepared the present finalised report with the support of the MAFWR.

The Consultant evaluated the current data collection system, verified its compliance with regional and international standards, evaluated the related Oracle database and the statistical reports resulting from it, and conducted a retrospective data analysis for the period 2014-2023. The results of the analysis were presented at the 20th Session of the WPDCS, held in Cape Town during 26-30 November 2024. Section 7 describes in full the methodology that was used in the data analysis process. During 2025 the work has deepen

The minutes show that Oman has made a number of commitments to the IOTC WPDCS, all of them for the short- and medium terms. I

list those that come immediately to my mind, and without prioritizing them.

- (a) Consolidating the Oracle database.
- (b) Producing final official figures.

Resolution 18/01 On an interim plan for rebuilding the Indian Ocean yellowfin tuna stock in the IOTC area of competence

Resolution 19/01 On an interim plan for rebuilding the Indian Ocean yellowfin tuna stock in the IOTC area of competence

Requirement number: 2.17Obj2101 - Information required: Catch limits – Nominal catch of YFT in 2024 - Deadline: 12/3/2026

Information required: Report on methods for achieving the YFT catch reductions

**APPLIES ONLY TO THE ISLAMIC REPUBLIC OF IRAN, MADAGASCAR, OMAN AND SOMALIA**

1. Did you implement the obligation ?

- NIL Report / Not Applicable - CPC is not subject to yellowfin tuna catch reductions in 2024
- NIL Report / Not Applicable - No YFT catch limit applies to CPC
- YES - Implemented
- NO - Not implemented

2. A system or procedures exist to monitor and to ensure compliance with the with the limit of catch of Yellowfin tuna (YFT) and methods of YFT catch reductions adopted by the CPC ?

- NO - CPC has NO system / procedure to monitor compliance with this binding measure, AND NO action in relation to potential infringements.
- YES - CPC has system AND procedures to YES monitor compliance with this binding measure, AND to take action in relation to potential infringements

a. System or procedures to monitor compliance with IOTC binding measure are :

-  
-

b. System or procedures to respond to instances of non-compliance are :

- Reduction of fishing capacity
- Reduction of fishing effort
- Reduction of the number of fishing vessels on the IOTC record of Authorised vessels
- Reduction of the number of active fishing vessels
- Reduction of the number of Authorisation to Fish issued to fishing vessels
- Seasonal closures imposed on the fleets
- Individual catch limit defined by vessel
- Individual catch limit defined by fleet segment
- Individual catch limit defined by fishing gear

Add any method/Corrective measures / actions implemented and not listed above:

**Scope of IOTC Resolution 19/01 in relation to supply vessels. (not objected by Oman).**

In 2019, the IOTC Commission adopted a restructuring plan to reduce the number of supply vessels **that some CPCs** were operating to support the tuna fishing activities of their registered purse seiners.

Point 16 of IOTC Resolution 19/01 obliged those CPCs with, at the time, registered purse seiners and supply vessel to implement this restructuring plan within 4 years time. **Those CPCs were bound** to progressively reduced their number of supply vessels, to reach a ratio of 2 supply vessels in support of not less

than 5 purse seiners, all of the same flag State (Point 16, [letter b](#)).

On top of that, Point16, [letter c](#), **those CPC** that were subject to adopt and implement a restructuring plan were not allowed to register any new or additional supply in the IOTC-Vessels List after 31 December 2017.

In 2019, **Oman did not have registered purse seiners. And, of course, it had not any registered supply vessels.** So this part of the IOTC Resolution 19/0 did not apply to Oman. Like so many other IOTC CPCs this provision did not apply to them.

It is important to highlight that letters a, b and c) f Point 16 **applied only** to the CPC that were bound to adopt and implement a Restructuring Plan to reduce their number of supply vessels.

**Since mi-2022 to February 2025, Oman have registered 6 purse seiners.**

In the second semester of 2025, Oman registered two supply vessels in the IOTC-Vessels List.

Supply vessel AlMalah was registered in the ICCAT List.

**Not being bound by letters a to c of Point 6 of IOTC Resolution 19/01**, Oman then applied and registered this supply in the IOTC-Vessels List.

The General Secretary of the IOTC authorized this registration in August 2026.

However, with a view to respect the ratios of supply, vessel versus number of purse seiners, included in this IOTC Resolution 19/01,

by analogy, Oman decided not to register more supply vessels, so BY ANALOGY Oman complies with the ratio of having only 2 supply vessels for a total of 6 purse seiners.

The compliance status determination of a reporting requirement is, where applicable, grounded in the following main elements, as provided by the IOTC Rules of Procedure (2023), Annex V:

- Transposition of Commission decisions - Legislation or administrative orders
- Provision of information on system or procedures to monitor and ensure compliance of vessels and persons
- Reporting deadline, and
- Reporting format – IOTC standard

#### Year reported on/Year assessed: 2025

- Assessment of legislation (LEG): Not assessed
- Assessment of system and procedures (SPV): Not assessed
- Assessment of IOTC standard (STD): Assessed

Notes:

- Result of assessment: Causes mentioned below are not exhaustive and are only examples; other causes can apply depending of the context and information available.
- Observations mentioned below are not exhaustive and are only examples; other observations can apply depending of the context and information available.

### **IOTC Standard:**

The RoP Annex V requires that submissions contain all mandatory information or data required, in the agreed format.

The standard in term of data/information/fields to be provided/completed is defined: **All sections applicable responded and all sub-sections/questions applicable responded.**
