Comments/remarks about your submission and the implementation of this requirement:

Description of the problem:

In accordance with its status as a cooperating non-contracting party (CNCP) of the Indian Ocean Tuna Commission, Liberia is required to submit 3 mandatory reports and also meet several reporting requirements. For the 2024 reporting period, Liberia failed to submit all the mandatory reports to the IOTC. The reports are the Compliance Questionnaire, Compliance Report, Scientific Report and Implementation Report. Liberia also failed in meeting most of its reporting requirements covering different fisheries and operational activities including transshipment. This led to Liberia having a compliance rate of 42.9 percent.

Root Causes of the problems

After a careful and thorough assessment of the root causes of the problems, it was found that the following issues caused the problem

Staff turnover. One employee who previously worked on the reports left and the organization and the new employee who took over did not adequately know how to work with the reports

Difficulty in working with the e-Maris platform. There were some challenges working with the two reporting platforms and this contributed to the failure to support the report

Administrative oversight. The supervisor who supervised the personnel responsible to work on the reports failed to ensure that the reports were done on time and this was due to oversight
