

## UPDATE ON THE IMPLEMENTATION OF THE IOTC REGIONAL OBSERVER SCHEME

PREPARED BY: IOTC SECRETARIAT, 23 NOVEMBER 2011

### PURPOSE

To inform the Scientific Committee (SC) of the status of implementation and reporting to the IOTC Secretariat of the Regional Observer Scheme (ROS) set out by Resolution 09/04 *on a Regional Observer Scheme*, and superseded by Resolution 11/04 *on a Regional Observer Scheme* at the 15<sup>th</sup> Session of IOTC in 2011.

### BACKGROUND

At the 13<sup>th</sup> Session of the Commission, the Commission adopted Resolution 09/04 *on a Regional Observer Scheme*, superseded in 2010, and again in 2011 by Resolution 11/04 *on a Regional Observer Scheme*. In 2010, the Commission addressed concerns raised by some CPCs with artisanal fleets, on which it is difficult to deploy on-board observers due to the small-size of the artisanal vessels and/or to their large numbers which would require high deployment levels and in 2011, the Commission extended the period for submitting the Observer Trip Report from 90 days to 150 days.

Resolution 11/04 *on a Regional Observer Scheme* makes provision for the development and implementation of national observer programmes among the IOTC CPCs starting in July 2010 and covering “*at least 5 % of the number of operations/sets for each gear type by the fleet of each CPC while fishing in the IOTC Area of competence of 24 meters overall length and over, and under 24 meters if they fish outside their EEZs shall be covered by this observer scheme. For vessels under 24 meters if they fish outside their EEZ, the above mentioned coverage should be achieved progressively by January 2013*”.

Moreover, the resolution states that “*the number of the artisanal fishing vessels landings shall also be monitored at the landing place by field samplers*” and that “*the indicative level of the coverage of the artisanal fishing vessels should progressively increase towards 5% of the total levels of vessel activity (i.e. total number of vessel trips or total number of vessels active)*”.

At its 13<sup>th</sup> Session the IOTC Scientific Committee reviewed the report of the technical workshop organised in May 2010, and endorsed the documents produced by the Secretariat, i) an Observer Manual, ii) a set of observer forms for all gears and iii) an Observer Trip Report template, which contains minimum reporting requirements.

The Scientific Committee also endorsed the recommendation of the workshop that all CPCs shall submit to the Secretariat a list of their observers participating in their national observer programme.

### DISCUSSION

As from October 2011, four CPCs (France(OT), Japan, Madagascar and Seychelles) have submitted a list of accredited observers. Although incomplete for the European Union as a whole, the fleets from Portugal and France have submitted a list of accredited observers.

To date only two observer trip reports have been submitted to the Secretariat, one by China and the other by EU,Portugal.

Table 1 provides a summary of the status of implementation of the ROS by all IOTC CPCs

### RECOMMENDATION

That the Scientific Committee:

- 1) **NOTE** the update on the implementation of the Regional Observer Scheme (ROS) and **EXPRESSED** its strong concerns regarding the low level of reporting to the IOTC Secretariat of both the observer trip reports and the list of accredited observers since the start of the ROS in July 2010.
- 2) **AGREE** such a low level of implementation and reporting is detrimental to its work, in particular regarding the estimation of incidental catches of non-targeted species, as requested by the Commission.
- 3) **RECOMMEND** the Commission consider how to address the lack of implementation of observer programmes for their fleets and reporting to the IOTC Secretariat as per the provision of Resolution 11/04 *on a Regional Observer Scheme*.
