

e-DFAD 1.1.0 Release notes

19 March 2026

This release includes the following:

- [NEW] A bulk template with a single sheet for reporting all types of operations
- [NEW] New filters added: FOBs deactivated in the EEZ of Coastal States, Deployment over buoy quota, Deployment with a deprecated biodegradability category.
- [NEW] Activity highlights (in-app and in downloads)
- [IMPROVEMENT] Better handling of large submissions
- [IMPROVEMENT] A scheduler to sync RAV PS vessels information to e-DFAD (schedule set to nightly)
- [IMPROVEMENT] Bulk log activations now generate an "idle" and an "active" revisions, as in interactive log activation.
- [IMPROVEMENT] The display of Transfers in Activities & Changes has been improved.
- [IMPROVEMENT] Better protection against simultaneous updates to the same FOB.
- [IMPROVEMENT] Added the "Discard" FOB activity to align with FOB states after deactivation
- [IMPROVEMENT] In bulk, better handling of unresolved vessel IOTC numbers
- [IMPROVEMENT] Bulk submissions now accept non fully qualified vessel IOTC identifiers
- [IMPROVEMENT] In French, the translation of "log", previously "épave", has been replaced with "débris" in application, reporting templates and user guides
- [IMPROVEMENT] Improved language of error messages when trying to declare Activation on an FOB that is already deployed
- [IMPROVEMENT] Downloaded search results now include a column with the FOB type
- [IMPROVEMENT] The date and time of last connection of a user are now recorded and displayed in their User details page.
- [FIX] An issue where, in downloaded search results with "code and names" selected, Biodegradability category is missing the codes
- [FIX] An issue where, in Bulk Registration, rows with no vessel report the issue "vessel delisted or reflagged"
- [FIX] An issue where Multi-managers can only set permissions for their own Party
- [FIX] An issue where, as a Secretariat user, activating a newly created DFAD returns a blank page
- [FIX] An issue where amending a card to add a comment does'nt activate the Submit button
- [FIX] An issue where the Transfer Activity card doesn't show the Over quota badge
- [FIX] An issue where, after a Transfer, the "Last modified by" metadata field shows "unknown"

- [FIX] An issue where a Bulk Replacement using buoy ID as target reports an error about the old buoy being already active
- [FIX] An issue where Transfers jump ahead in history when the old buoy is deactivated.
- [FIX] An issue where, in bulk, reporting a log activation with a buoy previously deactivated ignores the provided vessel id
- [FIX] An issue where bulk activation of Logs using the French template parses records as DFADs
- [FIX] An issue where the preferred language set for a user isn't properly honored
- [FIX] An issue where, when doing an interactive transfer, if the new buoy has previously been reported as lost/abandoned, no warning is returned.
- [FIX] An issue where, when doing a bulk transfer, if target buoy has been previously retrieved, the error message is displayed on the new buoy ID
- [FIX] An issue where, when doing an interactive transfer, if the target buoy has previously been retrieved, no issue is returned.
- [FIX] An issue where, when declaring an Activation, if the Buoy is set for deployment on another owner's FOB, a WARNING is returned instead of an ERROR.
- [FIX] An issue where, when doing an Interactive Transfer, clearing the target Buoy Id field freezes the form.
- [FIX] An issue where, as a Secretariat user, looking at the history of a transferred FOB shows the previous vessel ID as <missing>
- [FIX] An issue where sorting the list of results on Buoy Owner returns "No data"
- [FIX] An issue where, when doing a bulk activation, providing a different buoy ID returns an error
- [FIX] An issue where, when doing a bulk Transfer, no Warning is issued if the FOB already belongs to the owner
- [FIX] An issue where triggering some actions could result in a blank page.
