

# e-DFAD 1.3.0 Release notes

29 June 2026

This release includes the following:

- [NEW] Tracked amends by Flag CPCs to BO submissions outside of correction window
- [IMPROVEMENT] General improvements to the Amend process
- [IMPROVEMENT] Visual indication and message for over quota activation have been improved in search results
- [FIX] An issue where, when reporting deactivation of the old buoy post-transfer, the language in the drawer is about reporting the Transfer
- [FIX] An issue with bulk registration where errors could be displayed incorrectly when the DFAD was already registered
- [FIX] An issue where an invalid log type in bulk activation doesn't show as an error if the buoy ID is missing/unknown
- [FIX] An issue where, in search results, Logs show the biodegradability as missing rather than N/A
- [FIX] An issue where, in bulk replacements, not providing a new buoy model does not return an error
- [FIX] An issue where, for bulk deactivations, warnings on deprecated biodegradability category were not displayed properly
