

## E-training tool descriptor

Supra-category:	IOTC ROS Observer Co-ordinator Training (IOTC ROS OLC)
Category:	Category: Preparation of the Observer for deployment, Briefing and Reporting (IOTC ROS OLC TR6)
Course:	<i>Logistical processes of briefing and deploying the observer. In-trip reporting, health and safety control (IOTC ROS OLC TR6.01)</i>

### Course Description

Observer deployments should follow a sequence of pre-defined steps to prevent important issues or items being overlooked, to ensure the safety of the observer at-sea and to provide the observer with the needed support and orientation to successfully accomplish their work.

The purpose of this course is to familiarize participants with the logistical processes of briefing and deploying the observer, in-trip coordination, reporting and health and safety control.

Participants are to autonomously complete this e-training module in preparation for the interactive practical workshop on Observer Program Development & Logistic Coordination, so they can clearly define CPC Observer Program standards and procedures for the briefing and deploying of observers and include this information in the *CPCs' Observer programme development & observer logistical co-ordination guide*.
